# 1 AQ-21x frame Modbus map

## 1.1 FVSPE Modbus map

The following table lists modbus holding registers for AQ-210 frame units with firmware FVSPE\_v2.1.1.3-233. The firmware is used by the following device types:

- AQ-F201
- AQ-F205
- AQ-F210
- AQ-F215
- AQ-V211
- AQ-S214
- AQ-S215
- AQ-P215
- AQ-E215

### NOTICE!

Best way to always get the latest Modbus map is to load the aqs configuration file from the unit and in the AQtivate setting tool go to *Tools → Communication → Modbus map*.

Table. 1.1 - 1. AQ-21x frame Modbus map

| Holding Register | Parameter                | Access | Length |                                                    |
|------------------|--------------------------|--------|--------|----------------------------------------------------|
| HR1              | Modbus requests          | R/W=0  | 1      | Diagnostic request counter                         |
| HR2              | Modbus quality           | R      | 1      | Diagnostic quality                                 |
| HR3              | Modbus errors            | R/W=0  | 1      | Diagnostic error counter                           |
| HR4              | Modbus Ctrl OK           | R/W=0  | 1      | Diagnostic Control OK counter                      |
| HR5              | Modbus Ctrl Errors       | R/W=0  | 1      | Diagnostic Control Error counter                   |
| HR6              | Object1 control register | R=0/W  | 1      | SELECTOPEN=0xA001;SELECTCLOSE=0xA002,CANCEL=0xA003 |
| HR7              | Object2 control register | R=0/W  | 1      | SELECTOPEN=0xA001;SELECTCLOSE=0xA002,CANCEL=0xA003 |
| HR8              | Object3 control register | R=0/W  | 1      | SELECTOPEN=0xA001;SELECTCLOSE=0xA002,CANCEL=0xA003 |
| HR9              | Object4 control register | R=0/W  | 1      | SELECTOPEN=0xA001;SELECTCLOSE=0xA002,CANCEL=0xA003 |
| HR10             | Object5 control register | R=0/W  | 1      | SELECTOPEN=0xA001;SELECTCLOSE=0xA002,CANCEL=0xA003 |
| HR11             | Previous Event register  | R      | 6      | Event code                                         |
| HR12             | Previous Event register  | R      | 6      | Event timestamp (ms)                               |
| HR13             | Previous Event register  | R      | 6      | Event timestamp (sec Hi-16bits)                    |
| HR14             | Previous Event register  | R      | 6      | Event timestamp (sec Lo-16bits)                    |
| HR15             | Previous Event register  | R      | 6      | Event sequential index                             |

| Holding Register | Parameter                 | Access | Length |                                 |
|------------------|---------------------------|--------|--------|---------------------------------|
| HR16             | Previous Event register   | R      | 6      | RESERVED                        |

## 1.2 T Modbus map

The following table lists modbus holding registers for AQ-210 frame units with firmware T\_v2.1.1.3-233. The firmware is used by the following device types:

- AQ-T216
- AQ-T215

### NOTICE!

Best way to always get the latest Modbus map is to load the aqs configuration file from the unit and in the AQtivate setting tool go to *Tools* → *Communication* → *Modbus map*.

Table. 1.2 - 2. AQ-21x frame Modbus map

| Holding Register | Parameter                | Access | Length |                                                    |
|------------------|--------------------------|--------|--------|----------------------------------------------------|
| HR1              | Modbus requests          | R/W=0  | 1      | Diagnostic request counter                         |
| HR2              | Modbus quality           | R      | 1      | Diagnostic quality                                 |
| HR3              | Modbus errors            | R/W=0  | 1      | Diagnostic error counter                           |
| HR4              | Modbus Ctrl OK           | R/W=0  | 1      | Diagnostic Control OK counter                      |
| HR5              | Modbus Ctrl Errors       | R/W=0  | 1      | Diagnostic Control Error counter                   |
